# Exploring for High-Grade Gold & Copper in Mexico's famed Sierra Madre Gold Belt

TSX-V: RMI | US:RIGMF | FRA:4U5 | [ridgestonemining.com](http://ridgestonemining.com)

# SAFE HARBOUR STATEMENT

Some of the statements contained in this presentation may be deemed “forward-looking statements.” These include estimates and statements that describe the Company’s future plans, objectives or goals, and expectations of a stated condition or occurrence.

Forward-looking statements may be identified by the use of words such as “believes”, “anticipates”, “expects”, “estimates”, “may”, “could”, “would”, “will”, or “plan”. Since forward-looking statements are based on assumptions and address future events and conditions, by their very nature they involve inherent risks and uncertainties.

Actual results relating to, amount other things, results of exploration, reclamation, capital costs, and the Company’s financial condition and prospects, could differ materially from those currently anticipated in such statements for many reasons such as but not limited to; changes in general economic conditions and conditions in the financial markets; changes in demand and prices for the minerals the Company expects to produce; litigation, legislative, environmental and other judicial, regulatory, political and competitive developments; technological and operational difficulties encountered in connection with the Company’s activities; and changing foreign exchange rates and other matters discussed in this presentation.

Persons should not place undue reliance on the Company’s forward-looking statements. Further information regarding these and other factors, which may cause results to differ materially from those projected in forward-looking statements, are included in the filings by the Company with securities regulatory authorities. The Company does not assume any obligation to update or revise any forward-looking statement that may be made from time to time by the Company or on its behalf, except in accordance with the applicable securities laws, whether as a result of new information, future events or otherwise.

The TSX Venture Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of the contents of this presentation, that has been prepared by management.

All technical information in this presentation has been reviewed by **Steven I. Weiss** PhD., CPG, a Qualified Person as defined by National Instrument 43-101.

- **Proven management team with a track record** of discovery and monetization in Sonora State. Past success includes the sale of the largest moly deposit in Mexico for \$195 million and the discovery of three gold deposits which have become significant mines, two of which are still active in Sonora.
- Rebeico project is **located in one of the most prolific mineral belts in the world**, the Sierra Madre gold belt located in mining-friendly Sonora State, Mexico.
- **Multiple forms of mineralization identified** including high-grade veins, breccia and potential for intrusion-related, IOCG/porphyry. Highlights from drilling include 1.5 metres grading 36.1 g/t gold plus 1.2% copper, and 3.25 metres grading 8.3 g/t gold and 2.4% copper.
- **Large wholly-owned land package** encompassing 3,459 hectares on private land with numerous artisanal gold and copper workings. Limited past exploration as the claims were previously held by Peñoles for 25 years.
- **Maiden drilling underway at the newly-defined New Year Zone** is focused on the potential continuation at depth and sub-surface geometry of high-grade gold-copper mineralization discovered with 2019 surface sampling that returned up to 12.95 g/t gold and 0.65% copper.
- **The 2020 drill program**, which commenced in March 2020, will also test the potential subsurface junction of the New Year Zone with the southern part of Alaska vein where sampling by Agnico Eagle in 2012 returned up to 26.6 g/t gold and 1.26% copper.

Sonora, Mexico part of The Sierra Madre Gold Belt which has produced over 80 million oz of gold and 4.5 billion oz of silver

- Developed Deposits
  - Producing Mines
- published estimated resources

# 3 PRIORITY TARGETS

## New Year Zone

Robust mineralization over 125m by 175m area sampled up to 13.0 g/t Au and 0.7% Cu

## Alaska Vein

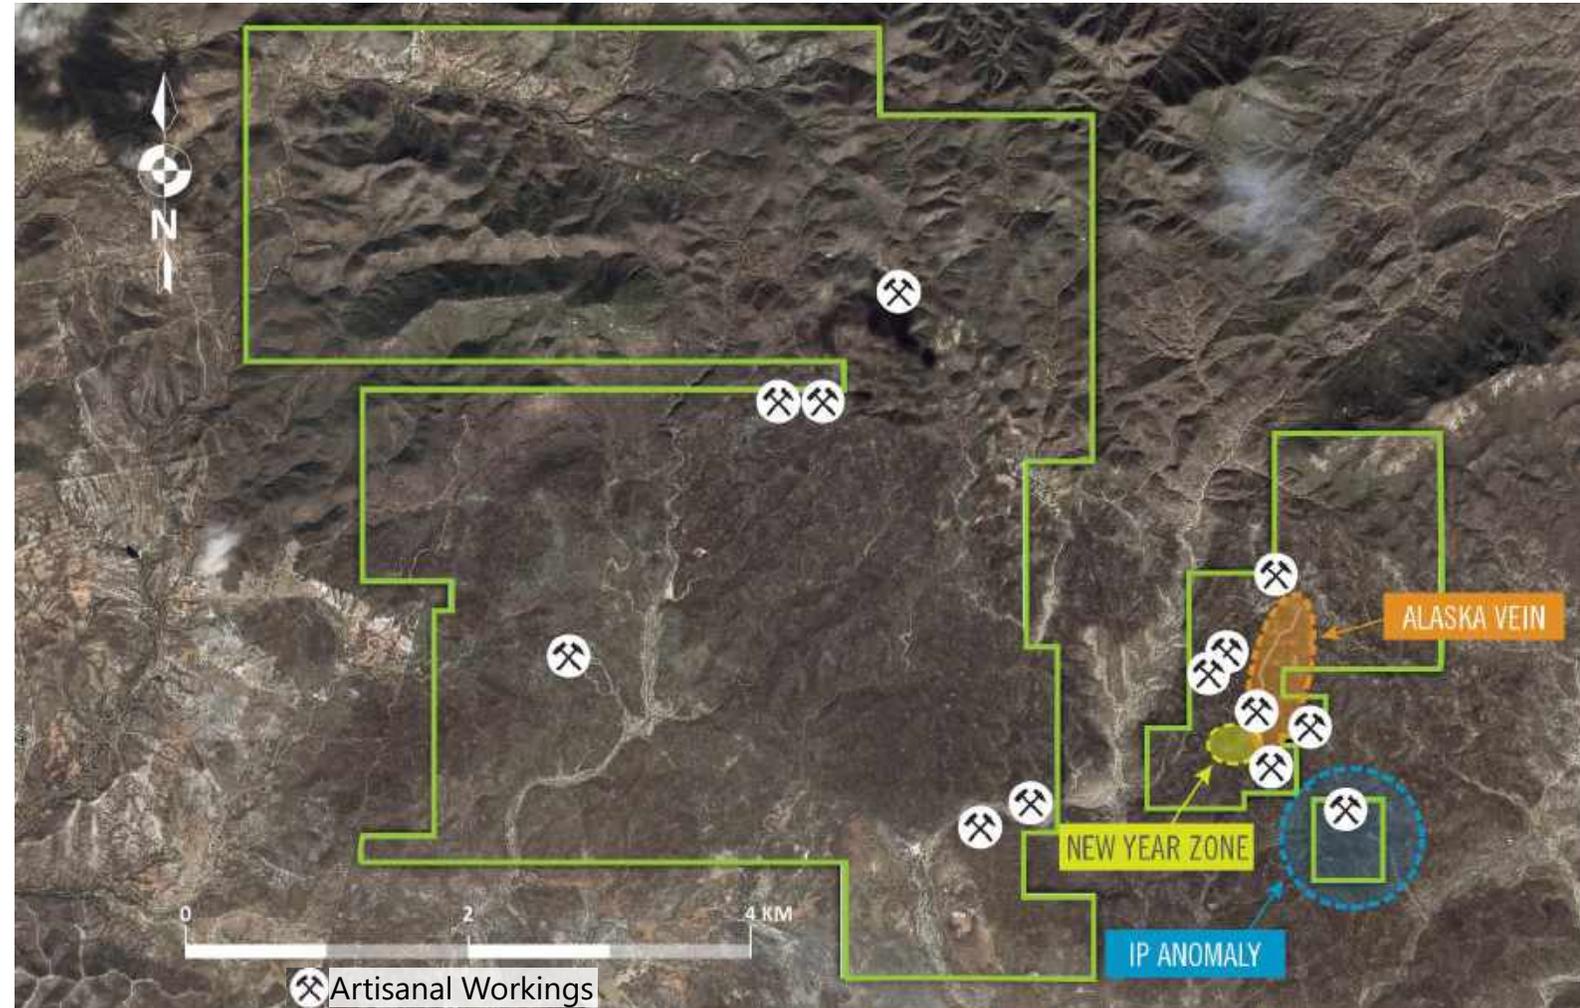

High grade gold & copper over 1.2km in strike length

## IP Anomaly

Intense Chargeability Anomaly 1,400m x 800m

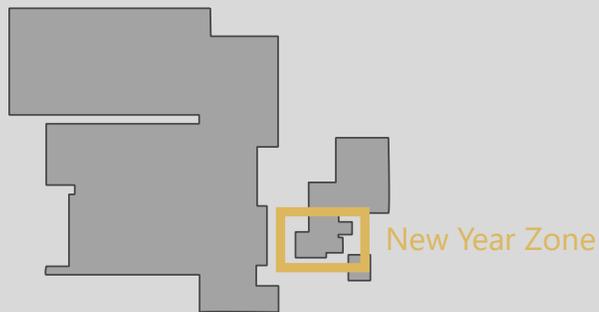

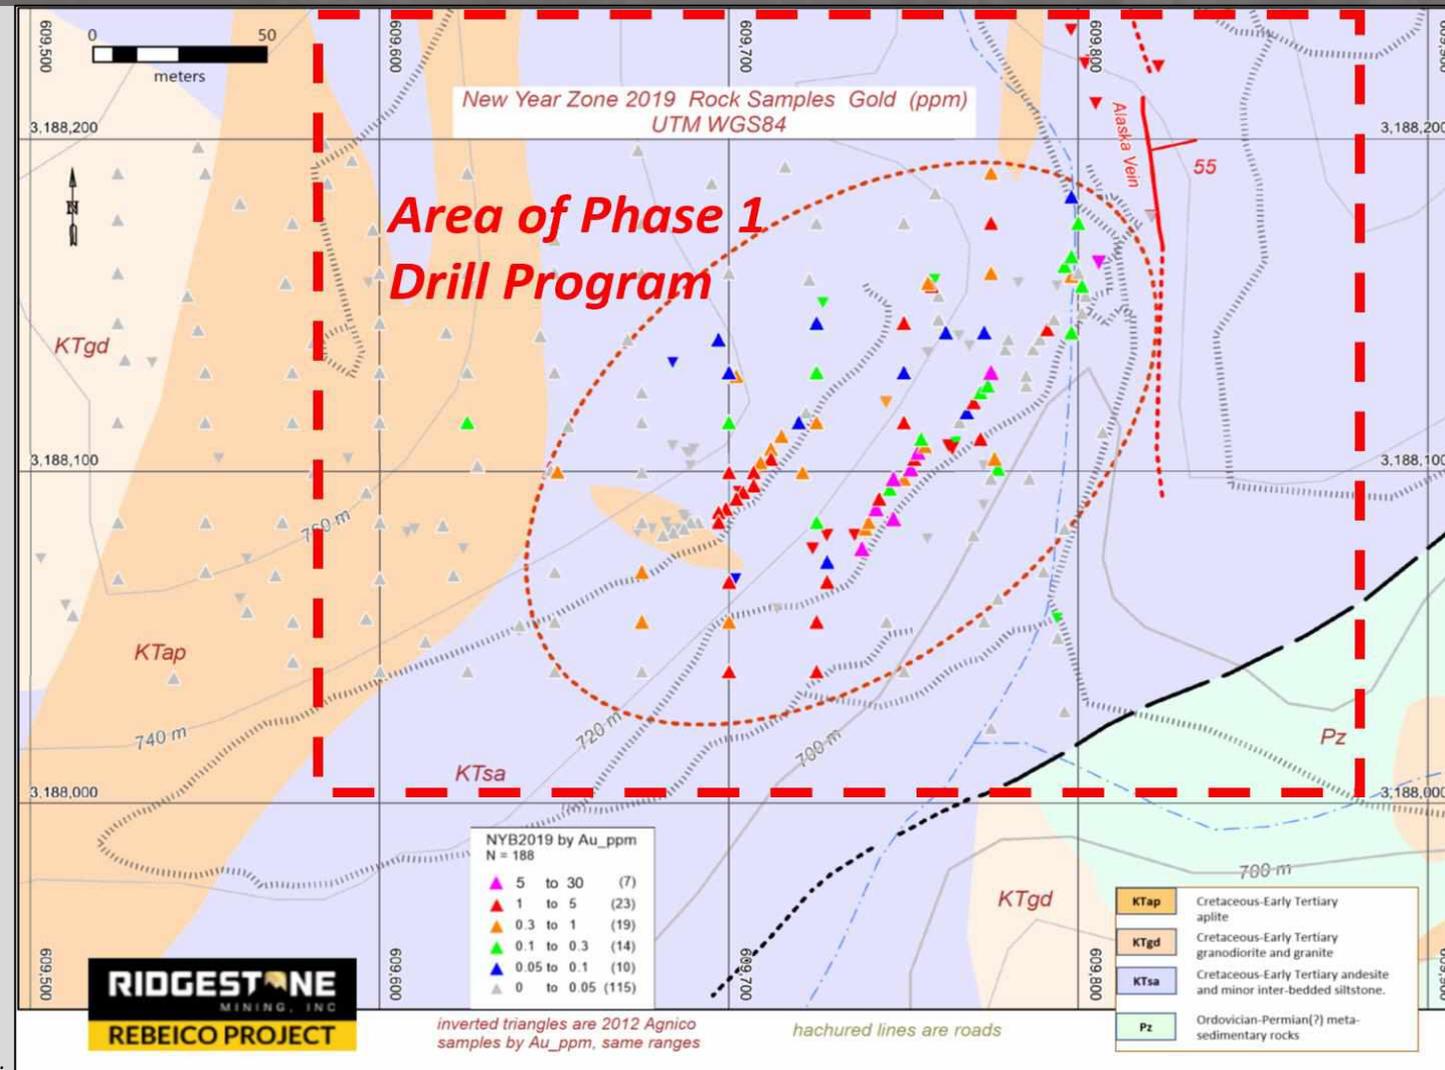

## Extensive Land Package

3,459 hectares (100%-owned) on private land, largely unexplored

# NEW YEAR ZONE

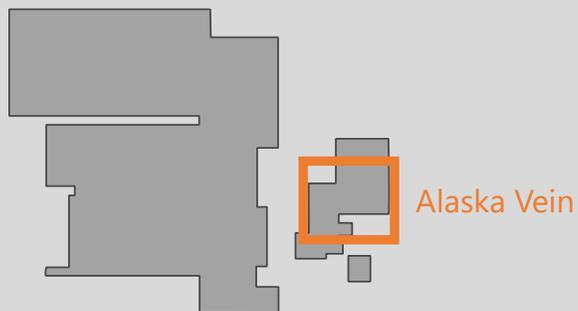

- Widespread gold and copper mineralization at surface over an area of 125 meters by 175 meters (2.2 hectares).
- High-grade gold and copper mineralization from 2019 exploration program returned up to 13 g/t gold and 0.7% copper.
- **Maiden diamond drill program (10-hole / 1,500 metres) commenced in March 2020 to test for the continuation of mineralization at depth and the potential intersection with the Alaska vein.**

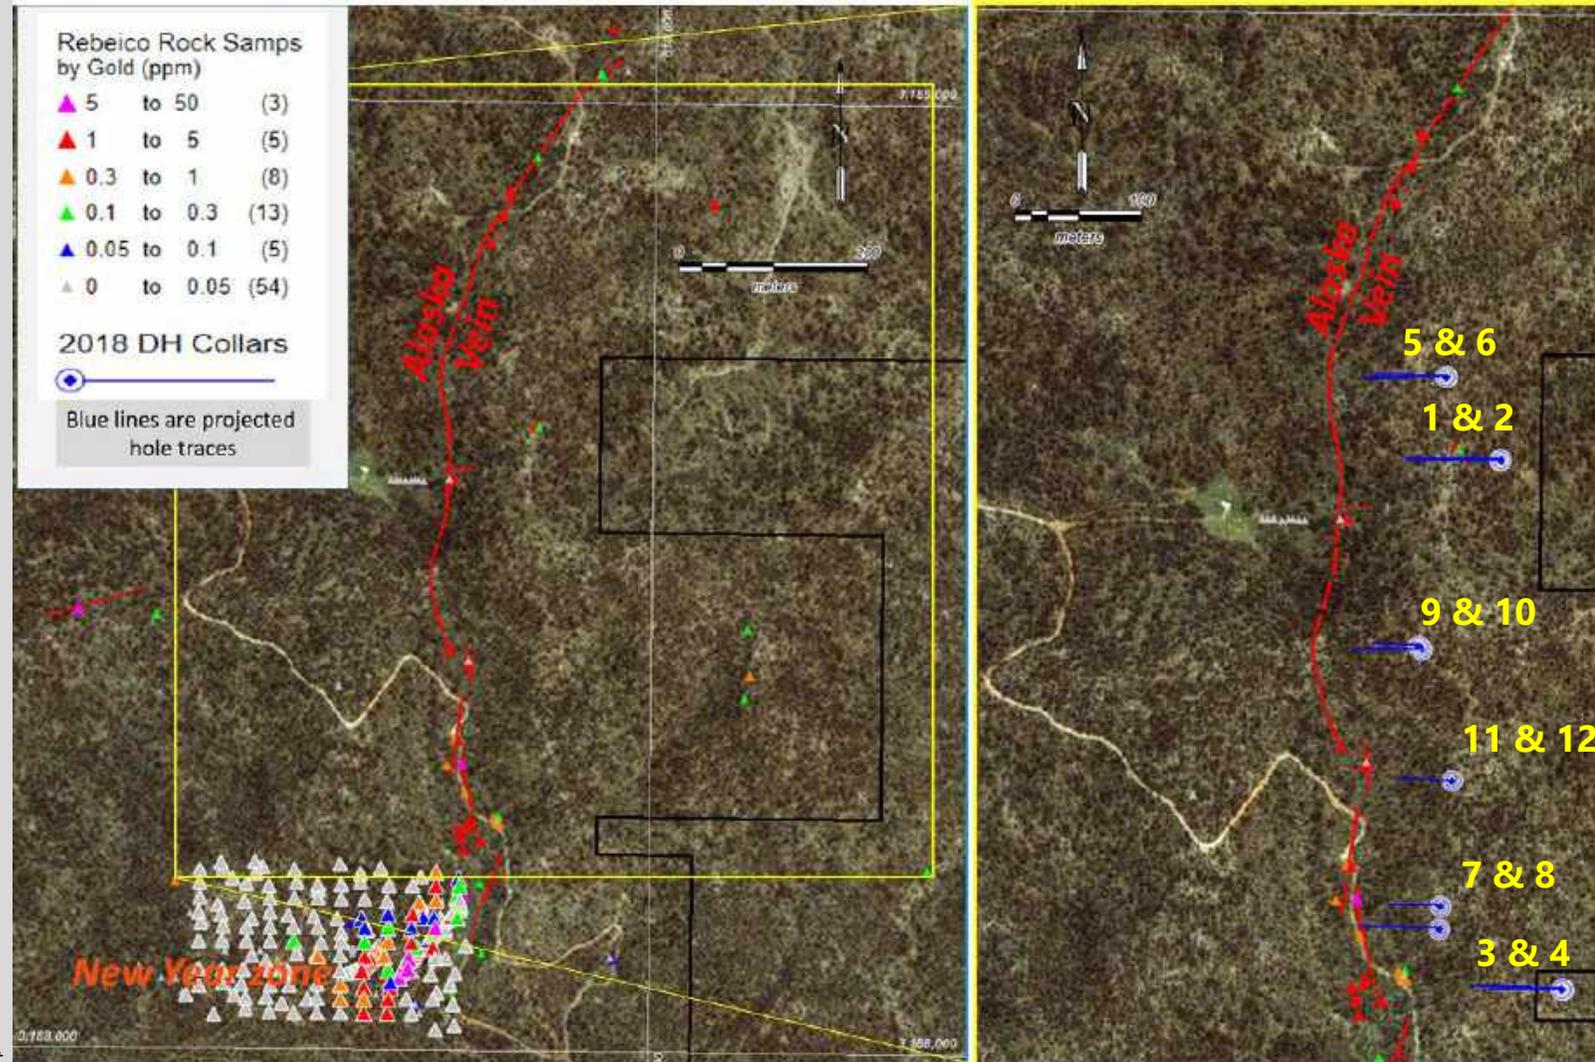

Outline shows an area of focus not meant to represent the size of the target.

# ALASKA VEIN

- High grade gold and copper confirmed by 2018 drill program.
- Highlights from drilling include: 36.1 g/t Au and 1.2% Cu over 1.5 m, and 8.3 g/t Au and 2.4% Cu over 3.25 m.
- Continuous strike length of over 1.2 km and open at depth.
- Recent geophysical survey suggests > 2km strike length possible.

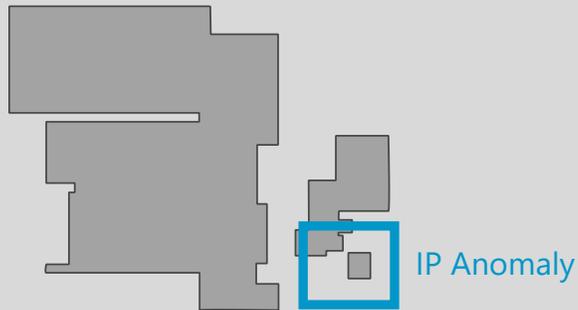

Outline shows an area of focus not meant to represent the size of the target.

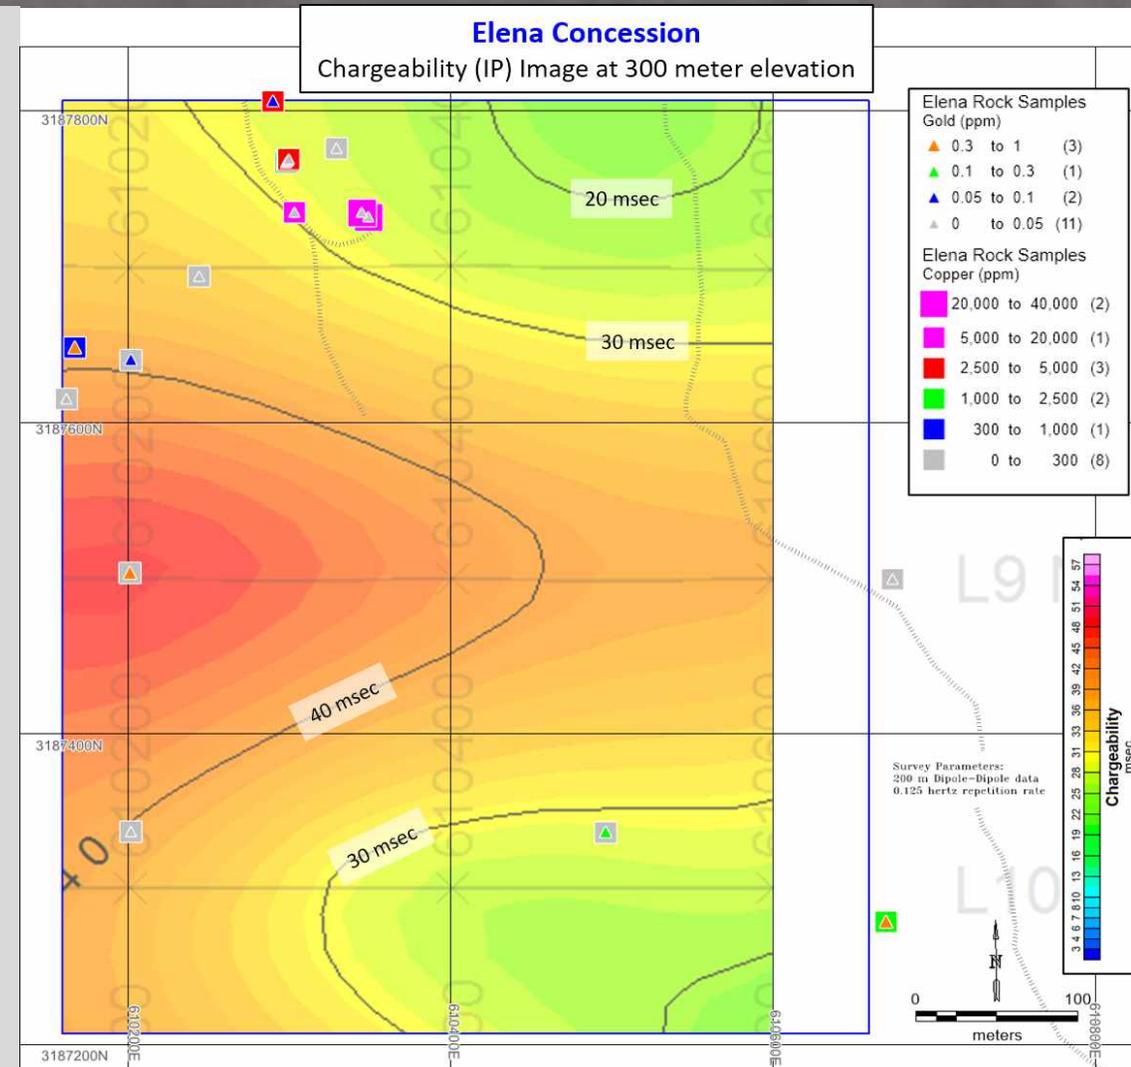

# IP ANOMALY

- Geophysics (IP) completed by Zonge of Tucson and consisted of 31.4 line km of coverage.
- A strong IP high (chargeability anomaly) was identified with an extent of 1,400 metres north-south and 800 metres east-west.
- This anomaly is most pronounced beneath the Elena claim where surface sampling has returned up to 3.77% copper.
- Geochemical signature consistent with possible copper-gold intrusion-related, skarn, IOCG or porphyry at depth.

Outline shows an area of focus not meant to represent the size of the target.

# MANAGEMENT TEAM

## Jonathan George CEO & DIRECTOR

Mr. George is a geologist and mining entrepreneur with over 35 years of experience in exploration, development and financing.

Previously President, CEO and co-founder of Creston Moly. Successfully raised \$40 million in equity to acquire, develop, and de-risk the El Creston project before selling it to Mercator Minerals for \$195 million.

Other notable highlights include President and CEO of ESO Uranium, the predecessor to Alpha Minerals which was acquired by Fission Uranium for \$185 million.

## Erwin Wong, BCom DIRECTOR, CFO

Mr. Wong has over 26 years of experience having served in senior management and board level positions for numerous Chinese and Canadian based enterprises, both public and private, which were involved in various sectors including transport, real estate, mining, life sciences and investment banking.

Mr. Wong had also founded a corporate advisory firm which assisted a number of companies with the complexities of initial public offerings, corporate governance and regulatory compliance in various jurisdictions.

Mr. Wong is a Chartered Accountant and holds a Bachelor of Commerce from the University of British Columbia.

## Benjamin Asuncion DIRECTOR

Mr. Asuncion has over 13 years of experience in the capital markets and resources sector. Since 2017, Mr. Asuncion has held senior management or director roles with a number of public companies.

From 2007 through 2016, Mr. Asuncion was with Haywood Securities Inc., as a mining research analyst covering companies of varying sizes and stages from exploration through to production.

Mr. Asuncion holds a Bachelor of Business degree from SFU with concentrations in finance, accounting and management science.

## Brian Goss, BSc. Geol. DIRECTOR

Mr. Goss has over 15 years experience in gold and mineral exploration. He is the Founder and President of Rangefront Geological, a premier geological services and consulting company that caters to a large spectrum of clients in the mining and minerals exploration industries.

Mr. Goss is also a Director of Lithium Corp, and has served as President & Director of Graphite Corp. (2014-2017), and Geologist for Centerra Gold on the REN project, a +2M oz gold deposit that was sold to Barrick Gold Corp.

Mr. Goss holds a Bachelor of Science with a major in Geology from Wayne State University in Michigan.

## Hsin-Chen (Ted) Liu DIRECTOR

Mr. Liu has over 25 years of experience with an active career in finance, investment, mergers and acquisitions with numerous Chinese corporations based in Taiwan, Hong Kong and mainland China.

As the Senior Board Advisor for Century Peak Metals Holdings Corp., he advised mainland Chinese investors on the strategic sale of metal ores, concentrates and operating mines located in the Philippines.

Mr. Liu holds a Bachelor of Financial Engineering and Actuarial Science from Soochow University, Jaingsu, China, and is a Licensed Private Equity Manager.

## Alfonso Daco

COUNTRY MANAGER

45 years in mineral resource industry with over 35 years in Mexico alone. Held senior positions with Goodman Group of Companies. Discoveries: La Colorado Gold Mine (> 2 Moz Au, 18 Moz Ag), El Castillo Gold Mine (> 1 Moz Au), Lluvia de Oro/Jojoba ( > 0.5 Moz Au.)

## Francisco Navarro

PROJECT MANAGER

Over 30 years in mineral exploration and development. Held numerous executive and managerial positions with international and local companies. Key member in discovery of Cuatro Hermanos (>1.0 Blbs Cu), La Colorado, El Castillo and Lluvia de Oro/Jojoba

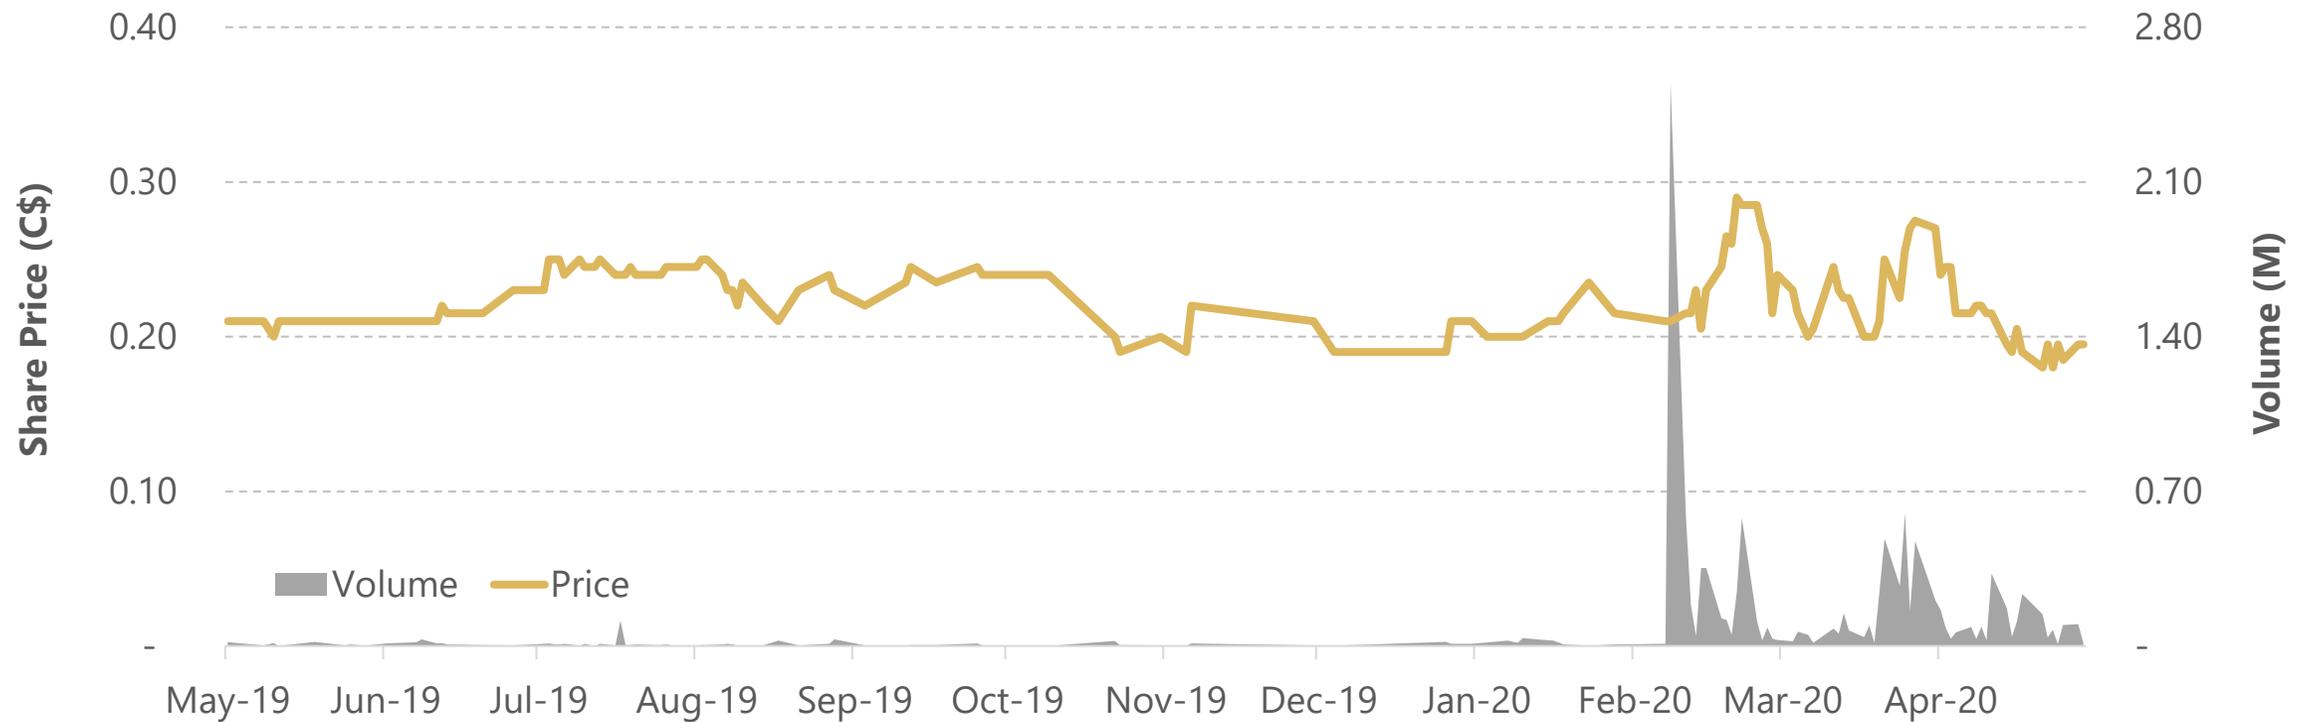

## Steven Weiss

CHIEF INDEPENDENT TECHNICAL ADVISOR

Over 40 years in mineral exploration. Led the exploration team at the El Sauzal gold mine with Glamis Gold in 2003 and subsequently all of Mexico with Goldcorp until 2013. Currently a Senior Associate Geologist with Mine Development Associates (MDA) in Reno, Nevada.
